Remarks:

- If there is no alternate diplomatic enclave, how would we handle antenna issue?

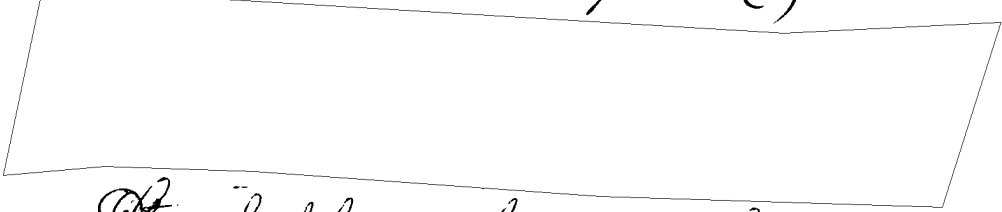

STAT

- Upcoming calls are for Panama, Tel Aviv & Vienna, Abidjan
- Bahrain: last chance offered to FBIS in Aug '85: (started ~ \$1)
- Extra floor (with FBIS paying for redesign only) into currently planned new Chancery.
- Construction starts aimed for June '86.
(A/E design not yet started)

Should work for 1 mile security
reasons, plus safety & fire
- Prefer free-standing building
(whether villa or high-rise)

STAT

- 
- After identifying location, check
for reception, then get as much
info. from RSO, etc. & then submit
recommendation for us to consider. Belbin
could assess.
 - RSO recommendation on security
grounds (make it sound like you're
Embassy annex) might result in
DOS funding. Emphasize FAAS, rather
dissemi-related features.
 - FBIS should put in for contingency
space - all upcoming new characters.
(*Tell us a lie. If you don't use it, fine*)
